

## Ethics & Boundaries

### Workshop & Learning Objectives:

The program will focus on a variety of ethical & boundary issues that counselors face and that supervisors face in today's health care and community environment. Issues will include updates on duties to report misconduct, duties to break confidentiality to prevent violence, boundaries challenges on the internet, delivery of services at a distance, relationships with former clients, and many other issues. He will utilize case examples and video clips, and there will be an opportunity to ask questions & discuss gray areas. Handouts will be available to participants electronically.

### As a Result of the Training Participants will:

- Participants will be able to articulate current Minnesota standards for duty to warn and protect;
- Participants will be able to articulate duties to report professional misconduct
- Participants will be able to describe five key ethical principles key to decision-making
- Participants will be able to discuss key challenges in social media interaction with clients
- Participants will be able to articulate challenges in use of internet social support sites
